

**Name: Jane Smith**

***Skills:***

Python, Deep Learning, TensorFlow, PyTorch, NLP, Feature Engineering, EDA

***Experience:***

- Led a team to build NLP models for entity recognition with 90% precision.
- Designed scalable data pipelines for real-time analytics.
- Developed reinforcement learning models for decision-making systems.

***Projects:***

- Building natural language processing pipelines for chatbot automation.
- Creating federated learning frameworks for privacy-preserving AI.
- Improving customer segmentation models through advanced clustering techniques.

**Fit to JD:** True
